Profile

Junior motion designer who designs and animates 2D motion graphics in Adobe After Effects for social media, ads, UI and product videos: kinetic typography, 2.5D parallax and 3D camera, rigging, tracking and compositing. I use generative AI where it makes the result better, and write my own After Effects scripts with AI-assisted coding to speed up repetitive production work.

Experience

05/2026 – 07/2026 — **Motion Designer & Creator**, Loadbearing, own project
Short-form explainer channel on infrastructure and technology: 37 reels in three months, produced with my own pipeline in Claude Code and Remotion.

03/2026 — **Freelance Motion Designer**, Swiss e-ID tutorial
Onboarding tutorial for the Swiss e-ID portal, from a written brief to delivery: screen recording, editing, UI animation with glassmorphism callouts, simple sound design.

07/2025 – 01/2026 — **Relocation to Switzerland**

04/2025 – 06/2025 — **Motion Designer**, Arbita Agency, performance marketing (iGaming), Kyiv, remote
Static and motion ad creatives for social media from briefs: one full video a day or 3–4 adaptations, up to 20 static banners a day. Portfolio on request.
